

MICROCHIP FORMAT GUIDE

MicrochipHelp.com if you need a difficult or unregistered microchip traced.

Always check PetMicrochipLookUp.org for every chip even if you know the format. It is *not unusual* for chips to be registered with other microchip companies. Any microchip company will register any other microchip company's chip on demand. An owner may want to register all her pets with one company, regardless of who made the chips.

Most chip "numbers" can also include letters.

(Go to the end of the table if the microchip is not registered.)

IMPORTANT! A very small number of chips are registered in PetChipRegistry at PetChip.info which does not participate in the AHAA lookup tool. (Not to be confused with FreePetChipRegistry.com which is indexed in AHAA.) ***If you have a chip with no information, particularly a chip from a small company, look it up in this database.***

European Chips

If the chip **does not begin with a 9**, check to see if it is a country code:

https://en.wikipedia.org/wiki/ISO_3166-1_numeric#Current_codes

If the country code indicates it is European, check both <http://www.europetnet.com/> **and** <http://www.petmaxx.com/> (Also check [PetLog](#) if UK chip.)

PetMaxx shows the databases for each country. ***Regardless of what the PetMaxx returns (it is usually negative), look down the page and click on the database listed for the country with that country code and search the number in that database.***

Here are additional European databases <https://www.carodog.eu/identification-and-registration/>

Page down on this page for the rest of the world, Australia for example <https://translate.google.com/translate?hl=en&sl=pl&u=http://chwiladlapupila.pl/warto-wiedziec/wyszukiwarki-zaczepowanych-zwierzat/&prev=search>
